Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-54 and 63-73, drawn to a method or system for servicing a wellbore wherein a loop system is utilized to convey steam or fluids down the wellbore, classified in class 166, subclass 303.
 - II. Claims 55-62, drawn to a method or system for servicing a wellbore comprising a plurality of heating zones, classified in class 166, subclass 313.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the “plurality of heating zones” called for in the claims of Group II are not required by the claims of Group I (see evidence claims 1, 33, 60 and 69). The subcombination has separate utility such as production tubing in a vertical well that extends through a plurality of producing zones.

Inventions I and II are further distinct each from the other because the “loop system” that is specifically called for in the claims of Group I is not required by the claims of Group II. Conversely, the “plurality of heating zones” that is essential for in the claims of Group II is not required by the claims of Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 571-272-7028. The examiner can normally be reached on 9:15-5:45 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
